The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/723,680	<b>Applicant(s)</b> DEVLIN ET AL.	
	<b>Examiner</b> Mathieu D. Vargot	<b>Art Unit</b> 1791	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 03 March 2008.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

1.The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stockinger et al in view of the admitted prior art as set forth in the instant specification at page 2, line 22 through page 3, line 5 and Thompson (see col. 4, lines 27-42, particularly line 37).

Stockinger et al and the admitted prior art are applied for reasons of record, these references essentially failing to disclose the instant antioxidant or stabilizer. However, Thompson discloses that malic acid and other biocompatible organic acids are conventionally used to stabilize mendicants containing oxyalkylene polymers. Based on the teaching of Thompson, one of ordinary skill in this art would have every reason to believe that such acids would have also stabilized the polyoxyalkylene polymer set forth in the claims. As Thompson discloses the stabilizer for a mendicant that will be placed on or in the body, one of ordinary skill would believe that malic acid would be used in a medical device that would also be placed in or on the body.

2.Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

While it is agreed with that the prior art does not teach the instant invention, it does teach most of the instant invention but not the instant stabilizer, which has been what has been set forth in the rejection. Arguments directed to the aspect of water solubility

Art Unit: 1791

and the particular salt are now moot in view of the newly found reference to Thompson, which teaches using malic acid as a stabilizer.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mathieu D. Vargot whose telephone number is 571 272-1211. The examiner can normally be reached on Mon-Fri from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Johnson, can be reached on 571 272-1176. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
